

FlexPAC III

The Flexpac III is the perfect solution when high-end graphics and multiple displays are a must on the field. Fully configured with the latest Intel i7 or Xeon processors and Nvidia workstation graphics, this advanced portable computer not only delivers multi-viewing but also delivers extreme power for data & graphics usage.

The FlexPAC III is ideal for situational awareness applications, C4ISR, UAV and UGV control, geospatial intelligence operations, and pre-mission simulations. These systems are already in daily use by the US Navy on multiple platforms. It can also be used in many other applications, such as HD digital video processing in the broadcasting industry.

Constructed of high grade Aluminum, the FlexPAC III offers multi-screen workstation grade performance, massive memory capacity and multi-terabyte removable RAID arrays. It features triple 17.3" HD displays, an ATX motherboard, 7 slot spaces and 2 5.25" drive bays. The possible customizations and applications are endless. In addition to this, it can be modified to meet Mil-STD qualifications.
